8 hours CE for Optometrists

Friday, March 24

6:00pm

OAL Board of Directors Meeting (Ernest's Restaurant)

Saturday, March 25

7:00-8:00am

Registration & Continental Breakfast

8:00-8:50am

Anterior Segment Surgery Update

1 hr OD TPA CE

This multimedia course takes an in-depth look at several newly-approved anterior ophthalmic segment surgical procedures: Raindrop corneal inlay, SMILE - small incision lenticule extraction, and a new minimally invasive glaucoma surgery (MIGS) implant. Indications for surgery, surgical outcomes, surgical techniques, and post-operative management will be reviewed for each by an optometrist directly involved with these procedures.

Stephen Lewis, O.D., Willis-Knighton Eye Institute

NON COPE

8:50-9:40am

Clinical Grand Rounds: Posterior Segment

1 hr OD TPA CE

This course will discuss several posterior segment pathologies in-depth in a case-based format, including a review of relevant anatomy, various etiologies, differential diagnoses, clinical characteristics & presentations, associated findings, diagnostic testing technologies, treatment & management options, and other recent advances.

Breanne McGhee, O.D. & Danyetta Thomas, O.D.

NON COPE

10:00-11:40am

Update on AMD

2 hrs OD TPA CE

New treatments in the fight against macular degeneration are currently under investigation. This course will review current treatments, highlight some of the new treatment modalities, as well as new technology in the treatment of AMD.

Steven Ferrucci, O.D.

COPE ID: 45362-PS

NOON-1:00pm

Luncheon for ODs and Spouses/Guests (if registered)

1:00-2:40pm

Retina and OCT Grand Rounds

2 hrs OD TPA CE

This course reviews some of the basic principles of retinal OCTs as well as uses examples to help illustrate OCT findings associated with certain clinical entities. Clinical pearls for the various diseases are stressed, as well as new treatment options and recommended management.

Steven Ferrucci, O.D.

COPE ID: 50027-PS

3:00-4:40pm

A Closer Look at Ocular Manifestations of Systemic Disease

2hr OD TPA CE

This course highlights some of the important retinal findings we may encounter that are associated with systemic diseases. Topics include vascular occlusions, plaques, and hypertensive retinopathy. Management tips, both ocular and systemic, are provided to help the primary care optometrist co-manage these patients with other health care providers.

Steven Ferrucci, O.D.
